SUMMARY

Full-Stack Engineer with 3+ years shipping high-performance web apps, enterprise SaaS, and scalable microservices. Built DaySpheres — the US's largest Adult Day Care SaaS — and a production food delivery platform. Delivered 50% lower API latency, 35% Core Web Vitals improvement, and systems supporting 1,000+ concurrent users. AI HackFest 2023 Champion. Open to full-time, remote, and relocation opportunities.

EXPERIENCE

Full-Stack Engineer — Webby Media Digital Solutions SL

Jun 2025 – Present

Next.js · Python · PostgreSQL · Docker · Sentry

Remote

- Engineer and maintain full-stack features across Next.js frontend and Python backend services for a digital solutions agency.
- Built and launched OmniStreams (omnistreams.co) — a high-performance streaming platform with Django REST API, Nginx reverse proxy, and real-time pipelines.
- Deployed containerized services with Docker and managed production observability via Sentry APM.
- Optimized PostgreSQL queries and integrated cloud storage, improving system reliability and response times.

Junior Software Developer — Vonome Software & Systems

Apr 2026 – Present

Angular · NestJS · Keycloak · Docker · Portainer · Microservices

Dhaka, Bangladesh

- Build and maintain enterprise-grade Angular/NestJS features for large-scale SaaS; own reliability and code quality standards.
- Architected microservices with clear domain boundaries — independently deployable, fault-isolated services at enterprise scale.
- Implemented full Keycloak auth workflows (SSO, RBAC, token management), reducing unauthorized access incidents significantly.
- Shipped DaySpheres — US's largest Adult Day Care SaaS — covering scheduling, billing, compliance, and multi-facility management.

Junior Software Engineer — Munchies Food Delivery

Mar 2024 – Feb 2026

Next.js · NestJS · PostgreSQL · Redis · AWS S3 · Docker · TypeScript

Dhaka, Bangladesh

- Built Next.js SSR/SSG frontend for production food delivery platform — +35% Core Web Vitals, +40% organic search traffic.
- Developed multi-vendor RBAC admin panel with order lifecycle management and real-time analytics; cut manual ops effort by 30%.
- Engineered NestJS microservices backend (V3), 5+ decoupled services — 60% reduction in system downtime via fault isolation.
- Cut API latency 50% with Redis caching & PostgreSQL query optimization; managed 10,000+ daily assets via AWS S3 CDN.
- Built reusable React + Tailwind component library, accelerating feature delivery 25%. Led code reviews for 5-engineer team, reducing bug escape rate 20%.

KEY PROJECTS

OmniStreams — High-Performance Streaming Platform omnistreams.co

Next.js · Django REST · Docker · Nginx · PostgreSQL · Redis · Sentry

- Containerized streaming infrastructure with Django REST API behind Nginx reverse proxy; real-time pipelines, full Sentry observability, and scalable PostgreSQL + Redis data layer.

DaySpheres — US Largest Adult Day Care SaaS dayspheres.com

Angular · NestJS · PostgreSQL · Keycloak · Azure

- Full-featured SaaS: scheduling, billing, compliance reporting, multi-facility management, role-based portals for caregivers/admins.

Munchies — Multi-Vendor Food Delivery Platform munchiesbd.com

Next.js · NestJS · Redis · AWS S3 · Docker

- Handles 1,000+ concurrent orders at peak; real-time tracking, role-based dashboards, responsive SSR/SSG frontend.
